STRONGROOM FILE CONVERSION

DATASHEET

The solution for efficient and fast automated enterprise PDF conversions

Strongroom file conversion allows you to convert files to sustainable formats. This ensures that the files remain permanently accessible and readable. Before performing a file conversion, we perform an analysis of the existing files to determine which file conversions are possible. Strongroom file conversion is based on Doc-shifter, tightly integrated with the secure and scalable storage solutions of Data Matters and installed in ISO 27001 certified NorthC data centers in the Netherlands.

Why should you have a fast and reliable PDF conversion solution?

- PDF lies at the heart of every organization. Working with PDF is easy, efficient, common and it has many use cases, from archiving to external communications.
- Today, most organizations create PDF files manually. Manually creating PDFs is outdated, slow and introduces risks.
- At Data Matters, we know that automating PDF conversion adds value to your business. With the enterprise PDF converter solution, every input format (Word, XML, HTML, Excel, TXT and many more) can be transformed into a high-quality PDF file.
- Easy, fast and automated. No matter where these files reside (document management systems, content repositories, file shares, in email inboxes), our enterprise PDF converter solution is the answer.

Go beyond the simple and desktop PDF conversion capabilities now!

Content can reside in virtually any repository
We can connect to your systems and pull the files that need to be converted to high quality PDF files: File share, OpenText Documentum, Veeva Vault, Microsoft SharePoint, Dropbox, Box DMS, Hyland, Alfresco, Email systems, etc.

Add headers/footers in PDF output

Easily add headers/footers in PDF output, including job titles, company logos, pagination, watermarks, page numbers and many more. Fully automated, without manual intervention.

Extremely fast PDF conversion speed

Strongroom file conversion doesn't need authoring applications (MS Office or Adobe technology) to run, or to perform conversions. This significantly speeds up PDF conversion speed.

Merge multiple source files into 1 PDF

Automatically merge multiple source files from ZIP files, folders, Veeva binders, virtual documents in OpenText Documentum into one single PDF output after conversion.

Fully automated conversion of 300+ file formats

MS office files, images, audio/video, AutoCAD files and many more. Strongroom file conversion can automate the conversion of more than 300+ digital files. Fast, without manual intervention and at a high quality. Contact us at info@datamatters.nl to learn more about the supported file formats.

Add security to the PDF output

Add security to the PDF output to prevent printing, copying etc. from the output file. This provides a controlled copy of the original document for sharing, both internal and external.

Automatically create bookmarks in PDF

Bookmarks in PDF are created automatically from Word, PowerPoint, Excel. You don't need to do these manually anymore, using PDF editing tools. Saving you valuable time and reducing risks.

Integrated OCR capabilities

Create a fully searchable, selectable PDF with our integrated OCR (optical character recognition) engine. Rather than doing it separately, integrate OCR in your document conversion. Save time, reduce manual work and risks.

Unzip multiple files & Convert all to PDF

Automatically unzip files during conversion and convert these individually to PDF or PDF/A. With one click, without manual intervention.

Why Strongroom file conversion as your PDF conversion solution?

- Strongroom file conversion is easy to set up and maintain.
- Open connectivity and REST API's allow connection with any content repository.
- Any to PDF conversion capabilities. We support more than +300 file formats.
- Fully automated. Set up once and Strongroom file conversion will convert all the desired content into PDF.
- 10x faster rendering than comparable/manual PDF conversion methods.
- Reduced costs thanks to innovative technology. No need for Office & Adobe technology to create the perfect PDF.

Ideal solution for organizations

- That are looking for an **easy and automated PDF conversion solution**
- That are looking to drastically **reduce** the manual work while **maximizing** IT investments in PDF and PDF/A related processes

THE IMPACT OF AUTOMATED DOCUMENT CONVERSION 			
50.000 PDFs CREATED WEEKELY  PeopleScout converts 50.000 documents/week with DocShifter. Conversions are fully automated and don't require any manual intervention.	10% TO 0.1% FAILURE RATE DROP  With the previous solution, 1 out of 10 documents failed. DocShifter's quality has drastically reduced this to below 0,1%. PeopleScout saves 8 hours/week in correcting faulty PDF conversions.	8h/week FREED UP  Thanks to DocShifter, PeopleScout is saving 8 hours a week. That time is now being spent on valuable tasks and not on manual work anymore. This represents \$13.000/year.	15x FASTER PDF CONVERSION  From 1000 documents/60 minutes to 1000 documents/5 minutes. PeopleScout reduced the time needed to render a PDF by 91%.
"Our biggest achievement has been from the "set and forget" nature of DocShifter, it just works" Chis Bellgard - Systems Administrator at PeopleScout
