# What is Simplifai Studio?

Simplifai Studio is a state-of-the-art AI platform for Intelligent Process Automation. The Studio can be used for your business to deploy process automation in daily work processes. In Simplifai Studio, you can configure Digital Employees, add workflows and conditions, and integrate the solution with your systems using API/RPA. No coding needed.

The Studio not only enables you to configure and train your Digital Employees, but also facilitates managing and maintaining them efficiently.

**Automate work process**

**Train bots**

**Connect with API or RPA**

**Track performance**

# Configure Digital Employees in the Simplifai Studio

A Digital Employee is a modular, off-the-shelf, customizable AI solution that can be used to automate your work processes. It understands human communication, makes decisions, and performs tasks. The solution can be adapted to any business or industry and consists of Emailbot, Documentbot, and Chatbot. The bots either can be used individually or combined together to form a Digital Employee.

## Add action flows

In Simplifai Studio, it's easy to set up workflows according to your business logic. Adding rules and conditions are prime components of the action flows. Using an action flow, you can decide what actions the bot should execute and determine when they should be triggered.

## Track performance

Through the dashboard, you can track the performance of your Digital Employees. The dashboard displays overall traffic and gives you great insights about how well each task is performed. You can drill down in the data and download reports.

## Learn with the Simplifai Academy

You get access to the Simplifai Academy – a instructional course designed to explain the platform step-by-step. Here, you can learn about Artificial Intelligence, Intelligent Process Automation training, and how to train and configure the bots.
