Boost Business Agility and Performance

As IT and storage infrastructure demands grow, so do the challenges facing IT departments to manage infrastructure, maintain service levels, and deploy new projects on behalf of the business. New operating models are required to ensure IT delivers services that are dynamic, cost efficient, responsive, and compliant. As organizations grow, the ability to consume capacity in a more flexible manner becomes increasingly critical.

Storage as a Service from Hitachi Vantara offers 99.99% uptime, ease of deployment, and simplicity of control. The service enables customers to quickly access infrastructure services by reducing complex procurement and deployment cycles.

Agile

Innovate faster with rapid deployment, fulfillment, and self-service access.

Predictable

Increase security, performance, and availability with transparent reporting and billing.

Cloud-Managed

Support digital transformation at your pace.

Storage as a Service from Hitachi Vantara provides IT the opportunity to access services that are easy to onboard and simple to use. Business leaders can exceed expectations with accelerated project deployment while reducing the risks associated with traditional ground-up service development. This allows IT to become more flexible as they protect the business from runaway costs. Storage as a Service is a predefined and pre-architected cloud solution with guaranteed SLAs that are backed by the expertise of Hitachi Vantara and our partner ecosystem.

With an always available self-service console that supports ordering, delivery and resource provisioning, organizations

can focus on providing high quality, flexible solutions to their customers and employees. The result – IT can deliver complex projects with the agility of cloud and the security of on premises deployment – all within strict budget constraints. Storage as a Service from Hitachi Vantara enables:

- Value-add services and offerings.
- New conversations with existing consumers.
- Simplified technology procurement and delivery.
- A financially flexible consumption model with predictive, transparent pricing.
